AMENDMENTS TO THE CLAIMS

1. (Currently amended) A method for reducing the amount of space occupied by a

plurality of graphical elements including at least one graphical element having a filename when

the plurality of graphical elements is rendered on a graphical user interface, comprising:

rendering a graphical user interface including at least one viewable graphical element, the graphical element having a filename associated therewith, the filename being absent from the

user interface determining for each graphical element of the plurality of graphical elements if a

filename is or is not to be displayed with the graphical element when the graphical element is

rendered, the determination being based on the type of object that the graphical element

represents;

for each graphical element of the plurality of graphical elements whose filename is

displayed with the graphical element when the graphical element is rendered, rendering the

graphical element and the filename on the graphical user interface; and

for each graphical element of the plurality of graphical elements whose filename is not to

be displayed with the graphical element when the graphical element is rendered, adjusting the

alignment of the plurality of graphical elements on the graphical user interface to reduce the

amount of space occupied by the plurality of graphical elements and rendering the graphic

element, but not the filename, on the graphical user interface.

2. (Currently amended) The method according to claim 1, wherein the at least one

viewable graphical element is an icon.

(Currently amended) The method according to claim 1, further-comprising

wherein determining if [[the]] a filename is or is not to be displayed with a graphical element on

the graphical user interface is based upon a type of data associated with a component of the

filename

3.

-2-

4. (Currently amended) The method according to claim 3, wherein the filename is

not to be displayed if the data associated with the component of the filename is image data.

5. (Currently amended) The method according to claim 3, wherein the filename is

not to be displayed if the data associated with the component of the filename is multimedia data.

6. (Currently amended) The method according to claim 1. further comprising

wherein determining if the filename is or is not to be displayed on the graphical user interface is

based upon an attribute of the filename.

7. (Currently amended) The method according to claim 6, wherein the filename is

not to be displayed on the user interface if the filename is determined to be a machine generated

file name.

(Currently amended) The method according to claim 6, wherein the filename is

not to be displayed on the user interface if the filename has a filename extension related to

multimedia files.

8.

9. (Currently amended) The method according to claim 8, wherein the filename is

not to be displayed on the user interface if the filename extension relates to one of image, video

and audio.

10. (Canceled)

11. (Currently amended) The method according to claim 1, further-comprising

rendering a wherein when the plurality of viewable graphical elements having whose filenames

are not visible on the user-interface; and to be displayed are rendered, adjusting at least a row of

the plurality of $\frac{1}{2}$ whose graphical elements $\frac{1}{2}$ whose filenames $\frac{1}{2}$ not $\frac{1}{2}$ not $\frac{1}{2}$ whose $\frac{1}{2}$ is $\frac{1}{2}$ and $\frac{1}{2}$ is $\frac{1}{2}$ in $\frac{1}{2}$ i

interface to be displayed so that the graphical elements are proximately closer to one another as

LAW OFFICES OF CHRISTENSEN O'CONNOR JOHNSON KINDNESS'** 1420 Fifth Avenue Suite 2800 Seattle, Washington 98101 226.682,8100 compared to a positioning of the viewable graphical elements on the user interface with visible whose filenames are to be displayed.

12. (Currently amended) The method according to claim 11, further comprising

shifting a row of viewable graphical elements whose filenames are to be displayed vertically upward toward the plurality of viewable graphical elements having filenames being absent from

the user interface, the shifting of the row being possible as a result of the filenames being absent

[[form]] from the user interface graphical elements whose file names are not to be displayed.

13. (Currently amended) A system, comprising: an arrangement for generating a

processing unit, memory, and a display, the memory storing processor executable instructions

that, when executed, cause the generation of a graphical user interface, the graphical user

interface including at least one viewable graphical element, the graphical element having a

filename associated therewith, the file-name filename being absent from the graphical user

interface, the graphic element being aligned more closely with surrounding graphical elements

by reducing the space therebetween, the reduction resulting from the filename being absent from

the graphical user interface.

14. (Currently amended) The system according to claim 13, wherein the arrangement

system is embodied in one of a computer, a personal digital assistant, a mobile device and an

information device.

(Currently amended) The system according to claim 13, wherein the arrangement

generates the at least one viewable graphical element as an icon.

(Currently amended) The system according to claim 13, wherein the arrangement

is operationally interfaced with a display device, the display device for displaying the graphical

user interface [[and]] includes a plurality of viewable graphical elements [[each]], at least some

LAW OFFICES OF CHRISTENSEN O'CONNOR JOHNSON KINDNESS*** 1420 Fifth Avenue Suite 2800 Seattle, Washington 98101 206.682,8100 of the plurality of graphical elements having associated filenames not visible on the graphical user interface in accordance with one of an attribute of data associated with the filenames and a

format of the filenames.

17. (Original) The system according to claim 16, wherein the attribute is multimedia

data.

18. (Original) The system according to claim 17, wherein the multimedia data is one

of audio data, image data and video data.

19. (Currently amended) The system according to claim 16, wherein the format of

the filenames is machine generated filenames automatically produced by the system.

20. (Currently amended) The system according to claim 16, wherein at least some of

the plurality of graphical elements having associated filenames visible on the graphical user

interface and wherein the plurality of viewable graphical elements having associated filenames

not visible on the graphical user interface are displayed on the display device in at least one

contiguous row, each of the plurality of viewable graphical elements being closer proximate to

one another in comparison to a rendering of the plurality of viewable graphical elements with

associated filenames visible on the graphical user interface.

21. (Currently amended) The system according to claim 20, wherein a row of

viewable graphical elements positioned directly below the plurality row of viewable graphical

elements having associated filenames not visible on the graphical user interface is shifted

upward, the shifting upward rendering the $\underline{upward\ shifted}$ row of viewable graphical elements

being in closer \underline{in} proximity to the plurality of viewable graphical elements having associated

filenames not visible on the graphical user interface in comparison to [[a]] what the positioning

of the viewable row of graphical elements would have been if the plurality row of viewable

LAW OFFICES OF CHRISTENSEN O'CONNOR JOHNSON KINDNESS^{PLLC} 1420 Fifth Avenue Suite 2800 Scattle, Washington 98101 206.682,8100 graphical elements were rendered with associated filenames visible on the graphical user interface had not been shifted unwardly.

22. (Currently amended) An article of manufacture for use in programming a processor, the article of manufacture comprising at least one <u>tangible</u> computer readable storage device including at least one computer program embedded therein that causes the processor to perform the method of claim 1.

23. (Currently amended) A method, comprising:

reviewing one of a data associated with a filename and a format of the filename, the filename having an associated icon:

determining if a filename is or is not to be displayed based on the reviewing step; and congregating icons without whose displayed filenames are not to be displayed in at least one row, the number of icons congregated in the at least one row being greater than a comparable row with icons having whose filenames [[being]] are to be displayed.
